

EXERCISE 4.1.2 What kind of smart are you?

Name: Alain S. Espiña Section: AIT

Instructions: Answer a Multiple Intelligences test on this link:
<https://mypersonality.info/test-mi>

1. What are your top three results?

My top three results are Logical Intelligence, Intrapersonal Intelligence and Spatial Intelligence. Logical intelligence placed first, then Intrapersonal for 2nd and Spatial for the third.

2. Do you agree with the results of the online test? Why or why not?

I agree with the result of the online test since it is almost the same with what my previous teachers always tell me. They always point out that I go for logical things more than choices that could make more people happy despite being inefficient. I do not fully agree on the results such as the musical and linguistic intelligence. I do agree that they are low but not as low as 0 to 10.

3. Give instances of how these intelligences help you as a student.

Logical Intelligence helps me in decision making which is a very essential part for all kinds of problem solving that we would tackle as engineers. Spatial Intelligence is also helpful in solving problems since it would be easier for me to solve problems when they are visualized. Intrapersonal Intelligence on the other hand is not really helpful in an academic sense but more of helping me to make the right choices.

4. How can you harness these intelligences in everyday life?

Logical Intelligence can be improved by thinking about the possible solutions to everyday problems. Spatial Intelligence can be harnessed by simply imagining about the things we interact with everyday. These objects could help you to recognize some of the problems where their applications and visualizations may be similar to our everyday objects. Intrapersonal Intelligence can be harnessed by simply reflecting on your choices in life, it doesn't need to be long, just meaningful.
